Student Built Home Program

Making The Difference

A cooperative program sponsored by the Quad City Area REALTOR® Association and the Quad City Home Builders Association, in cooperation with Scott Community College, and the Davenport Community Schools and North Scott School District, lenders, business leaders, vendors, merchants, and media.

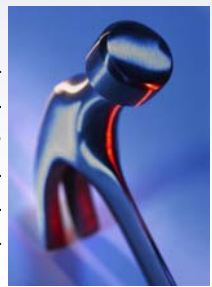

The Student Built Home Begins Here

The History of The Student Built Home Program

In 1974, an educational program sponsored by the Greater Davenport Board of REALTORS® was born. The purpose of this “hands on program”, was to motivate and educate high school students in various aspects of the home building industry. From 1974 to 1985 eleven homes were constructed and hundreds of young people were introduced to career opportunities in the building trade fields which many are still associated with today.

Difficult and challenging economic times forced the retirement of this valuable educational program in 1985. In 1998, the program was started back-up by popular demand and is going strong today. Stretching across the community growing every year with new sponsors and participants all coming together providing opportunities for students seeking an interest in the building trades.

The Quad City Area REALTOR® Association invites and welcomes your participation in this valuable education program and to be a part of it's success.

PREPARATION

- Parts of a house
- Safety
- Construction

FRAMING

- Floors
- Sills
- Joists
- Decking
- Walls
- Exterior windows
- Exterior doors
- Interior windows
- Interior doors

- Roofs
- Trusses
